CALL FOR PAPERS

Call for Papers for *Clinical Diabetes* Special Issue on Patient-Centered Diabetes Care

The editors of *Clinical Diabetes* seek manuscript submissions for a special-topic issue on Patient-Centered Diabetes Care scheduled for publication in mid-December 2017.

ARTICLE FOCUS: The editors seek articles on a wide range of topics under the broad general umbrella of “patient-centered care.” These could include research reports, descriptions of innovative programs or initiatives, review articles, or commentaries on topics such as treatment adherence, patient empowerment, advocacy, or patient-provider collaboration—in short, anything that strengthens patient-provider relationships, promotes communication, or facilitates patients’ active involvement in their own care. Articles that report measurable improvements (e.g., in clinical outcomes, patient satisfaction, providers’ skills, patient-provider relationships, or system-level barriers) are of particular interest.

Submit online by June 15, 2017, at <https://mc.manuscriptcentral.com/clinical-diabetes>.
